This Module provides the total management of all assets and property locally or globally and can be integrated with our QR code or barcode system. Information including photos, value, life cycle and service or maintenance history are all captured. A well designed library forms the backbone for all information, photographs, reports, evidence, compliance and documents stored in the system providing a sound platform from which all historical information is available to authorised users of the system with full remote global viewing of all assets.

Features

- ✓ User friendly process
