A total security reporting package to manage all your security requirements, irrespective if they are in-house or sub-contracted. Designed around compliance and intelligence, this module will provide you with total control of your existing services, identify and escalate risks, highlight non-conformances and provide a comprehensive local or global history of all events and incidents.

Accurate data and photographic intelligence is gathered and can be interrogated or considered to facilitate informed decisions. A well designed library forms the backbone for all information, photographs, reports evidence, compliance and documents stored in the system providing a sound platform from which all historical information is available to authorised users of the system.

One Connect Security Module provides remote access across all national or global sites, facilities or properties with real time information or updates.
