The Sustainability Module is an inputting tool to manage the usage and costs across an organisation for energy, water, gas, refrigerant, diesel, petrol and waste. A comprehensive resource tool that tracks and reports on spikes or exceptions across all fuel, waste and energy based on specific criteria entered into the system. Information provides a clear snap shot of the organisations local, national or global environmental and carbon footprint. A comprehensive reporting and auditing function supports this module.

Features

- ✓ User friendly
- ✓ Fully customisable
- ✓ Can be accessed by Ipad or PC
- ✓ Resource logging for Electricity, Gas, Water, Refrigerant, Diesel, Petrol & Waste
- ✓ Financial Tracking of all resource costs
