The One Connect Tender Management Module captures every aspect of the tender process providing a totally transparent and independent outcome based on a set of rules and protocols pre-determined in line with an organisations code of conduct. This module was specifically designed with Government tendering best practice and processes and incorporates recommendations made by the Independent Commission Against Corruption in their report of February 2012.

The Tender Module assists corporate and government organisations to establish a universal streamlined approach to tendering which is totally transparent,

independent, removes doubt and collusion, escalating any attempt to act outside of the organisations protocols while establishing benchmarked efficiencies and best use of time. The comprehensive reporting tool gives an organisation confidence that the process has been followed every time and that the systems analysis and outcome is fair, independent, ethical and validated against the tenders criteria, scope and specification.

This module is designed for RFQ, EOI, short or comprehensive tenders and forms the back bone of the organisations procurement management system. A dashboard provides immediate access to every tender, RFQ or EOI in the system from which you can access a full comprehensive report which captured the entire process and outcome. A full delegation of authority mechanism is included which captures the involvement of every participant in the process including Finance, Management, Evaluation Panel, Operations and Procurement Team.

This module provides an efficient ethical decision making process which keeps all participants and stakeholders in the loop through the systems library and communications framework. The benefits include streamlining and universal approach to tendering, reduced time in terms of running tenders, validated outcomes against dispute and protects the organisations brand and reputation with the ability to comprehensively undertake a full key stroke internal or external audit of every action, transaction and decision.

Our system is an industry first initiative, user friendly, fully customisable and the library feature facilitates immediate access to your entire tendering history, contracts, specifications and reports from any PC, laptop or IPAD.

Features

- | | | | |
|---|--|---|-----------------------------------|
